

# AHMED RAZA

## DevOps Engineer

Lahore, Punjab, Pakistan | 03000847243 | mian.ahmad.pk16@gmail.com | linkedin.com/in/ahmed-raza7

## PROFESSIONAL SUMMARY

---

DevOps Engineer with hands-on experience in containerization, automation, and infrastructure basics, built through DevOps roles at Corvids Lab and Doublytech. Skilled in Docker, Kubernetes basics, Git/GitHub version control, Linux, SQL, and Terraform basics, with additional Python programming and applied AI/ML exposure. Looking for an environment where I can grow and learn throughout my career.

## CORE SKILLS

---

- Programming: Python, Flask, Pandas, Django
- Containerization & Orchestration: Docker, Kubernetes (basics)
- Infrastructure as Code: Terraform (basics)
- Version Control System: Git, GitHub
- Operating System: "Linux" (Ubuntu, Debian)
- Scripting: Shell, Bash
- Database: SQL
- Code Quality & Testing: SonarQube, Unit Testing, Integration Testing
- Data & Automation: Data Scraping Tools, Workflow Automation, ETL Basics
- Security & Identity: SSO, IAM, Azure Entra ID (Azure AD)
- Machine Learning: Dataset Training, Model Deployment, TensorFlow
- Networking & Tunneling: Ngrok

## PROFESSIONAL EXPERIENCE

---

### DevOps Associate — Corvids Lab

Lahore, Pakistan

- Own containerization and deployment of applications using Docker, with early Kubernetes exposure, and manage version control workflows in Git/GitHub.
- Apply code-quality checks with SonarQube, plus unit and integration testing, to maintain clean, production-ready code.
- Build and maintain SQL-backed data pipelines, including ETL and data-scraping workflows, for analysis and reporting.
- Work within Linux environments using Shell/Bash scripting, explore Terraform for infrastructure provisioning, and handle SSO/IAM basics with Ngrok for local tunneling during testing.

### DevOps Intern — Doublytech

Lahore, Pakistan

- Built a Python-based data scraper tool to automate collection of data from external sources into structured, ready-to-use datasets.
- Developed a CRM (Customer Relationship Management) system backend to organize and manage collected leads and customer records.
- Containerized the scraper and CRM applications using Docker and configured CI/CD pipeline steps to automate build, test, and deployment stages.
- Used Git/GitHub for version control and collaborative development across the scraper and CRM codebases.
- Managed SQL databases to store, query, and maintain scraped data and CRM records, hosted and administered on Linux with basic troubleshooting.
- Applied SonarQube code-quality checks to keep the scraper and CRM codebase clean and production-ready.

### AI Apprentice — Samsung Innovation Campus

Lahore, Pakistan

- Selected through a competitive admission process for an intensive Artificial Intelligence apprenticeship.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) using Python (NumPy, Pandas) on Linux-based systems, with SQL for data extraction.
- Designed, trained, and validated supervised and unsupervised machine learning models, tracked with Git version control.
- Implemented and optimized deep learning architectures using TensorFlow and Keras, focusing on performance evaluation and model generalization.

PROJECTS

---

Student Form Application

- Built a student registration/form application with automated code-quality checks using SonarQube, version-controlled with Git/GitHub.
- Configured Single Sign-On (SSO) via Google Cloud for secure login, used SQL for backend data storage, and Ngrok for local tunneling to test and demo the app in real time on Linux.

Smart Farmer — AI-Powered Agri-Market App

- Built an AI-driven mobile app connecting farmers directly with buyers and machinery providers, with a CNN model for crop assessment — using SQL and Git across the stack.

AirWave — Agentic AI Automation Pipeline

- Built an automated pipeline that scrapes live data from Google News & Reddit and processes it using Groq + Claude (LLMs), developed and tested on Linux with Git-based version control.
- Generated structured content via LangChain/LangGraph agents and converted it to natural voice using ElevenLabs, delivering a ready-to-use script and downloadable audio.

EDUCATION

---

Bachelor of Science (BS), Software Engineering

Government College University, Faisalabad

CERTIFICATIONS

---

- Soft Skills Training — ICMPSD | IELTS — British Council
